

Dear Sirs

On behalf of our members and Industry stakeholders we urgently request that the no increases be introduced for either TNPA or TPT.

The export industry cannot accept annual increases as already South Africa's landside costs are exorbitant and not market related globally.

Industry is losing business because of this, the freight rates are competitive, the rate of exchange is in the exporters favour, and yet when adding in the landside, we lose out!

Our fuel costs are already above par, even though oil prices have decreased, our local fuel just continues on an upward trajectory!

The manufacturing/export industry creates jobs and in the critical state of our country's development, this is what we need.

Transnet can absorb this for the sake of our country – I am sure!!

Let's prove that we Care!!!

Thank you

Regards

Terry Gale
